Contents of Volume 74

Volume 74, Number 1, January 10, 1977

AUTHOR INDEX, Volume 74, Number 1, January 10, 1977 ii

MAYA SIEBER-BLUM and MAX M. BURGER. Isolation and Characterization of Nuclear Envelopes and Their Biosynthesis during the Cell Cycle 1

ROGER F. MARTIN, IAN RADFORD, and MARSHALL PARDEE. Accumulation of Short DNA Fragments in Hydroxyurea Treated Mouse L-Cells. 9

OSCAR E. BECK and HANS GUNTER GASSEN. Translation of Bacteriophage T4 mRNA into Active Lysozyme by a Wheat Germ Cell-Free System 16

JULIUS LOWENTHAL and VALERIE JAEGER. Synthesis of Clotting Factors by a Cell-Free System from Rat Liver in Response to the Addition of Vitamin K_1 *in Vitro* 25

D. J. DAVIS and ANTHONY SAN PIETRO. Chemical Modification of Spinach Ferredoxin: Evidence for the Involvement of a Complex between Ferredoxin and Ferredoxin:NADP Oxidoreductase in NADP Photoreduction 33

DENNIS W. JOLLY, BARNEY M. KADIS, and THOMAS E. NELSON, Jr. Estrogen and Prothrombin Synthesis. The Prothrombinogenic Action of Estrogen 41

CHRISTOPH KESSLER and GUIDO R. HARTMANN. The Two Effects of Rifampicin on the RNA Polymerase Reaction 50

STANLEY E. LANE, ANTHONY S. GIDARI, and RICHARD D. LEVERE. Glucocorticoid Potentiation of δ-Aminolevulinic Acid Synthetase in Chick Embryo Liver Cells: A "Permissive" Effect 57

J. R. PROHASKA, S.-H. OH, W. G. HOEKSTRA, and H. E. GANTHER. Glutathione Peroxidase: Inhibition by Cyanide and Release of Selenium 64

ARNOLD FRIDLAND. Effect of Cytosine Arabinoside on Replicon Initiation in Human Lymphoblasts ... 72

ROBERT A. FLOYD and LAILING M. SOONG. Spin Trapping in Biological Systems. Oxidation of the Spin Trap 5,5-Dimethyl-1-Pyrroline-1-Oxide by a Hydroperoxide–Hematin System 79

WILLIAM F. BOSRON, TING-KAI LI, LOUIS G. LANGE, WERNER P. DAFELDECKER, and BERT L. VALLEE. Isolation and Characterization of an Anodic Form of Human Liver Alcohol Dehydrogenase 85

DONALD E. BUSHNELL. Inhibition by Ultraviolet Irradiation of the Glucocorticoid Induction of Tyrosine Aminotransferase in Bromodeoxyuridine-Treated H-35 Hepatoma Cells in Culture 92

PAUL A. DAVIS and AMIYA K. HAJRA. The Enzymatic Exchange of the Acyl Group of Acyl Dihydroxyacetone Phosphate with Free Fatty Acids 100

STEVEN BIRKEN, DONNA L. SMITH, ROBERT E. CANFIELD, and IRVING BOIME. Partial Amino Acid Sequence of Human Placental Lactogen Precursor and Its Mature Hormone Form Produced by Membrane-Associated Enzyme Activity 106

SHANNON W. LUCID and MARTIN J. GRIFFIN. Cell Cycle Variations in HeLa 65 Plasma Membrane Alkaline Phosphatase 113

TUSN-TIEN WANG and N. MARTIN YOUNG. The Amino Acid Sequences of Two Putative Copper-Site Peptides from the "Blue" Copper Protein, Stellacyanin 119

LENA KJELLEN, AKE OLDBERG, KRISTOFER RUBIN, and MAGNUS HOOK. Binding of Heparin and Heparan Sulphate to Rat Liver Cells 126

DAWN B. MARKS and BARBARA J. KELLER. Proteolytic Digestion of Histones Indicates that the Nucleosomes of Nuclei and of Sheared Chromatin Are Similar 134

CLEMENT E. BURROWES and HENRY Z. MOVAT. Isolation of Antithrombin III from Human Plasma: Its Separation from α_1-Antitrypsin 140

JOHN Y. C. CHAN, CLEMENT E. BURROWES, FLAVIO M. HABAL, and HENRY Z. MOVAT. The Inhibition of Activated Factor XII (Hageman Factor) by Antithrombin III: The Effect of Other Plasma Proteinase Inhibitors 150

MARTINA CHU, H. B. DUNFORD, and D. JOB. Horseradish Peroxidase. XXV. An Electron Spin Resonance Study of the Low Temperature Photochemical Reaction of Compound I 159

A. D. E. BACHARACH, FRANCIS S. MARKLAND, AUGUST PELLINO, and BRUCE H. WEBER. Modification of Yeast 3-Phosphoglycerate Kinase: Isolation and Sequence Determination of a Nitrated Active-Site Peptide and Isolation of a Carboxyl Modified Active-Site Peptide 165

DAVID P. MORTON and STANLEY M. PARSONS. Synergistic Inhibition of ATP Phosphoribosyltransferase by Guanosine Tetraphosphate and Histidine 172

HANS SIGRIST, KRISTINE SIGRIST-NELSON, and CARLOS GITLER. Single-Phase Butanol Extraction: A New Tool for Proteolipid Isolation 178

THOMAS M. ANNESLEY and JAMES B. WALKER. Cyclocreatine Phosphate as a Substitute for Creatine Phosphate in Vertebrate Tissues. Energetic Considerations 185

MICHAEL G. RIGGS and VERNON M. INGRAM. Differences in Erythrocyte Membrane Proteins and Glycoproteins in Sickle Cell Disease 191

ARMEN H. TASHJIAN, Jr., EDWARD F. VOELKEL, and LAWRENCE LEVINE. Effects of Hydrocortisone on the Hypercalcemia and Plasma Levels of 13,14-Dihydro-15-Keto-Prostaglandin E_2 in Mice Bearing the $HSDM_1$ Fibrosarcoma 199

DAVID H. BOLDT, STEPHEN F. SPECKART, ROBERTA L. RICHARDS, and CARL R. ALVING. Interactions of Plant Lectins with Glycolipids in Liposomes 208

C. Y. LAI, E. MENDEZ, D. CHANG, and M. WANG. Primary Structure of Cholera Toxin B-Subunit ... 215

WILLIAM C. DUANE. Taurocholate- and Taurochenodeoxycholate-Lecithin Micelles: The Equilibrium of Bile Salt between Aqueous Phase and Micelle 223

H. J. LIPPS and N. R. MORRIS. Chromatin Structure in the Nuclei of the Ciliate *Stylonychia mytilus* ... 230

GERALD P. BRIERLEY, MARIANNE JURKOWITZ, and EDMUNDO CHAVEZ. Energy-Dependent Contraction of Swollen Mitochondria: Activation by Nigericin 235

YOSHIO TSUJITA and AKIRA ENDO. Evidence for the Presence of Membrane-Bound Forms of Acid Protease in *Aspergillus oryzae* 242

NICHOLAS LING. Solid Phase Synthesis of Porcine α-Endorphin and γ-Endorphin, Two Hypothalamic-Pituitary Peptides with Opiate Activity 248

SWEE HAN GOH and HERB B. LeJOHN. Genetical and Biochemical Evidence that a Novel Dinucleoside Polyphosphate Coordinates Salvage and *de Novo* Nucleotide Biosynthetic Pathways in Mammalian Cells 256

KAZUKO KAWASHIMA and MITSUO IZAWA. Phosphorylation of a Nucleolus-Specific Phosphoprotein *in Vitro* 265

KAM-FOOK FOK and JOHN A. YANKEELOV, Jr. Peptide-Gap Inhibitors: I. Competitive Inhibition of Aminopeptidase M by a Hydrolytically Resistant Dipeptide Analogue of Glycylleucine 273

R. E. CATALAN, M. P. CASTILLON, V. G. CORCES, and C. AVILA. *In Vivo* Regulation of Adipose Tissue Protein Kinase by Adenosine 3',5'-Monophosphate Mediated Glucagon Stimulation 279

DAVID E. AMACHER and MICHAEL W. LIEBERMAN. Removal of Acetylaminofluorene from the DNA of Control and Repair-Deficient Human Fibroblasts 285

WILLIAM I. MURPHY and GIUSEPPE ATTARDI. Size Distribution of Poly(A)-Containing Messenger RNA from Free Polysomes of HeLa Cells 291

P. DAVIES, Y. SHIZUTA, K. OLDEN, M. GALLO, and I. PASTAN. Phosphorylation of Filamin and Other Proteins in Cultured Fibroblasts 300

TOM J. GUILFOYLE and JOE L. KEY. The Subunit Structures of Soluble and Chromatin-Bound RNA Polymerase II from Soybean 308

CHIA C. PAO, JOHN PAIETTA, and JONATHAN A. GALLANT. Synthesis of Guanosine Tetraphosphate (Magic Spot I) in *Saccharomyces cerevisiae* 314

L. V. CRAWFORD and D. P. LANE. An Immune Complex Assay for SV40 T Antigen 323

Volume 74, Number 2, January 24, 1977

AUTHOR INDEX, Volume 74, Number 2, January 24, 1977 ii

MICHAEL McCARVILLE and VINCENT MARSHALL. Partial Purification and Characterization of a Bacterial Enzyme Catalyzing Reductive Cleavage of Anthracycline Glycosides 331

THOMAS E. HUTCHINSON, MARIE E. CANTINO, and EDWARD C. CANTINO. Calcium is a Prominent Constituent of the gamma Particle in the Zoospore of *Blastocladiella emersonii* as Revealed by X-Ray Microanalysis 336

H.-H. ARNOLD and A. OGILVIE. Unformylated Initiator tRNA Is Not a Signal for the Stringent Control of RNA Synthesis 343

FRANCIS J. DE TOMA, KATHRYN E. KINDWALL, and CATHERINE A. REARDON. The Effect of Tosyl Lysine Chloromethyl Ketone on the Activity of Uridine Diphosphoglucose Pyrophosphorylase of the Cellular Slime Mold *Dictyostelium discoideum* 350

L. I. SLOBIN and W. MOLLER. The Heavy Form of Elongation Factor 1 in *Artemia salina* Embryos Is Functionally Analogous to a Complex of Bacterial Factors EF-Tu and EF-Ts 356

HIROSHI AMANUMA, KIYOTO MOTOJIMA, AKIHITO YAMAGUCHI, and YASUHIRO ANRAKU. Solubilization of a Functionally Active Proline Carrier from Membranes of *Escherichia coli* with an Organic Solvent 366

BERNARD MOSS. Utilization of the Guanylyltransferase and Methyltransferases of Vaccinia Virus to Modify and Identify the 5'-Terminals of Heterologous RNA Species 374

PAUL G. JOHNSON, ABDUL WAHEED, LAUDIE JONES, A. J. GLAID, and OSCAR GAWRON. Identification of an Essential Residue of Pig Heart Aconitase 384

LIANG-FU TSENG, HORACE H. LOH, and CHOH HAO LI. Human β-Endorphin: Development of Tolerance and Behavioral Activity in Rats 390

H. HASKO PARADIES, BRIGITTE ZIMMER, and GUNTHER WERZ. Small-Angle X-Ray Scattering of D-Ribulose-1,5-Diphosphate Carboxylase from *Dasycladus clavaeformis* Roth (Ag.) in Solution 397

JUKKA FINNE, TOM KRUSIUS, and HEIKKI RAUVALA. Occurrence of Disialosyl Groups in Glycoproteins 405

M. WALKER-SIMMONS and C. A. RYAN. Wound-Induced Peptidase Activity in Tomato Leaves 411

JERZY DUSZYNSKI and LECH WOJTCZAK. Effect of Mg^{2+} Depletion of Mitochondria on Their Permeability to K^+: The Mechanism by Which Ionophore A23187 Increases K^+ Permeability 417

RODERICK A. CAPALDI, RANDY L. BELL, and THERESA BRANCHEK. Changes in Order of Migration of Polypeptides in Complex III and Cytochrome *c* Oxidase under Different Conditions of SDS Polyacrylamide Gel Electrophoresis 425

PETER S. TOBIAS and GEBHARD F. B. SCHUMACHER. Observation of Two Proacrosins in Extracts of Human Spermatozoa 434

ROBERT K. MacNEAL, BRADFORD C. WEBB, and DANIEL L. PURICH. Neurotubule Assembly at Substoichiometric Nucleotide Levels Using a GTP Regenerating System 440

NINO SORGENTE, ANNA G. BROWNELL, and HAROLD C. SLAVKIN. Basal Lamina Degradation: The Identification of Mammalian-Like Collagenase Activity in Mesenchymal-Derived Matrix Vesicles.. 448

M. L. SHULMAN, O. E. LAKHTINA, and A. Ya. KHORLIN. Specific Irreversible Inhibition of Human and Boar *N*-Acetyl-β-D-Hexosaminidase by 2-Acetamido-2-Deoxy-β-D-Glucopyranosyl Isothiocyanate.. 455

NARA FIGUEROA, BELA NAGY, and BIRESWAR CHAKRABARTI. Cu^{2+}–Hyaluronic Acid Complex: Spectrophotometric Detection 460

ARMIN HILDEBRANDT and HELMUT W. SAUER. Transcription of Ribosomal RNA in the Life Cycle of *Physarum* May Be Regulated by a Specific Nucleolar Initiation Inhibitor 466

SURENDRA P. VERMA and DONALD F. H. WALLACH. Changes of Raman Scattering in the CH-Stretching Region during Thermally Induced Unfolding of Ribonuclease 473

WINSTON C. CHEN, INDER JIT SUD, DONG-LANG CHOU, and DAVID S. FEINGOLD. Selective Toxicity of the Polyene Antibiotics and Their Methyl Ester Derivatives 480

Y. KOCH, TALLIE BARAM, E. HAZUM, and M. FRIDKIN. Resistance to Enzymic Degradation of LH-RH Analogues Possessing Increased Biological Activity 488

JOHN J. KING and D. MacDONALD GREEN. Inhibition of Nuclease Activity in *Bacillus subtilis* Following Infection with Bacteriophage SP82G 492

DAVID R. JOSEPH and JAMES N. IHLE. Comparison of Sequence Homology of Poly(A) and Non-Poly(A) Containing 34S RNA of AKR Murine Leukemia Virus 499

J. GLOSTER and P. HARRIS. Fatty Acid Binding to Cytoplasmic Proteins of Myocardium and Red and White Skeletal Muscle in the Rat. A Possible New Role for Myoglobin 506

P. P. K. HO, R. G. HERRMANN, R. D. TOWNER, and C. P. WALTERS. Reversal of Platelet Aggregation by Aortic Microsomes 514

C.-H. FLOREN and A. NILSSON. Degradation of Chylomicron Remnant Cholesteryl Ester by Rat Hepatocyte Monolayers. Inhibition by Chloroquine and Colchicine 520

J. M. C. GUTTERIDGE. The Effect of Calcium on Phospholipid Peroxidation 529

W. B. DANDLIKER, A. N. HICKS, S. A. LEVISON, and R. J. BRAWN. A Fluorescein-Labeled Derivative of Estradiol with Binding Affinity towards Cellular Receptors 538

LANYARD K. DIAL, SUZANNE MIYAMOTO, and EDWARD R. ARQUILLA. Modulation of ^{125}I-Insulin Degradation by Receptors in Liver Plasma Membranes 545

MICHAEL F. CZARNIECKI and EDWARD R. THORNTON. ^{13}C NMR Chemical Shift Titration of Metal Ion-Carbohydrate Complexes. An Unexpected Dichotomy for Ca^{+2} Binding between Anomeric Derivatives of *N*-Acetylneuraminic Acid (1) 553

MARTIN GROSS and JOHN MENDELEWSKI. Additional Evidence that the Hemin-Controlled Translational Repressor from Rabbit Reticulocytes Is a Protein Kinase 559

H. MIZUSAWA, S. TANAKA, M. KOBAYASHI, and K. KOIKE. Alkali-Labile Colicinogenic Factor E1 DNA Molecules Formed in the Presence of *N*-Methyl-*N'*-Nitro-*N*-Nitrosoguanidine 570

ANNE-MARIE BELLOCQ, STAFFAN CASTENSSON, and HANS SIEVERTSSON. Conformational Analysis of an Analogue of Thyroliberin (TᵢR.F.) 577

JANET M. DECKER and J. J. MARCHALONIS. Molecular Events in Lymphocyte Differentiation: Stimulation of Nonhistone Nuclear Protein Synthesis in Rabbit Peripheral Blood Lymphocytes by Anti-Immunoglobulin 584

HERMANN E. BLEICH, A. R. DAY, R. J. FREER, and JAY A. GLASEL. 360 MHz Proton NMR Spectra of Active and Inactive Derivatives of Methionine-Enkephalin. Assignments, Derived Parameters, Conformational Implications 592

SEI-ICHI TANUMA, TAKEMI ENOMOTO, and MASA-ATSU YAMADA. Distribution of Poly(ADP-Ribose) in Histones of HeLa Cell Nuclei 599

FRED I. TSUJI, MARLENE DeLUCA, PAUL D. BOYER, S. ENDO, and M. AKUTAGAWA. Mechanism of the Enzyme-Catalyzed Oxidation of *Cypridina* and Firefly Luciferins Studied by Means of $^{17}O_2$ and $H_2{}^{18}O$ 606

MATTHIAS SCHUMACHER, IRENE SEIDEL, and WOLF H. STRATLING. Elevated Cyclic GMP Concentrations during Estrogen Induced Differentiation of the Chick Oviduct 614

MARK E. CHRISTENSEN, ANN L. BEYER, BARBARA WALKER, and WALLACE M. LeSTOURGEON. Identification of N^G, N^G-Dimethylarginine in a Nuclear Protein from the Lower Eukaryote *Physarum polycephalum* Homologous to the Major Proteins of Mammalian 40S Ribonucleoprotein Particles 621

CHESTER MEYERS, AKIRA ARIMURA, ARIEL GORDIN, R. FERNANDEZ-DURANGO, DAVID H. COY, ANDREW V. SCHALLY, JACQUES DROUIN, LOUISE FERLAND, MICHELE BEAULIEU, and FERNAND LABRIE. Somatostatin Analogs Which Inhibit Glucagon and Growth Hormone More Than Insulin Release 630

C. T. NOGUCHI and A. N. SCHECHTER. Effects of Amino Acids on Gelation Kinetics and Solubility of Sickle Hemoglobin 637

GERALD R. REECK, T. BLAINE NELSON, JOSEPH V. PAUKSTELIS, and DELBERT D. MUELLER. Comparisons of Diisopropylfluorophosphate Derivatives of Chymotrypsin and Chymotrypsinogen by Phosphorus-31 Nuclear Magnetic Resonance 643

LOIS T. HUNT and MARGARET O. DAYHOFF. Amino-Terminal Sequence Identity of Ubiquitin and the Nonhistone Component of Nuclear Protein A24 650

BYRON A. DONEEN, DAVID CHUNG, DONALD YAMASHIRO, PING YEE LAW, HORACE H. LOH, and CHOH HAO LI. β-Endorphin: Structure–Activity Relationships in the Guinea Pig Ileum and Opiate Receptor Binding Assays 656

AUTHOR INDEX, Volume 74 1685

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 *(Arch. Biochem. Biophys.* (1966) **115**, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a footnote,** rather then in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1974) **160,** iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969.* Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys, 142, 363-370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.
